

# Shark Fin

Part# AB-10389

Fits: 2005+ RR, RS, RR-S, XTrainer (Except 125 RR-S)

## Installation Instructions:

1. Remove the rear wheel, remove the rear brake pad pin plug, the brake pad pin, and the rear brake pads.
2. Slide the brake caliper assembly back off the locating block of the swing arm, then separate the caliper support bracket (bottom half) from the caliper by sliding it off the pins.
3. The Shark Fin is going to replace the boot of the caliper support bracket; Remove the rubber boot, the locating pin & pad wear plate from the stock bracket, & install these parts in the same locations on the Shark Fin.
4. Use a medium strength (blue) thread locking agent on the locating pin threads, & apply a small amount of high quality grease to the locating pins.
5. Install the Shark Fin by lining up the 2 locating pins with the 2 rubber boots & slide them into each other. Slide the Shark Fin forward onto the swing arm locating block.
6. Reinstall the brake pads, pin, & pin plug. Before installing the rear wheel, wipe any debris off the rear axle, spacers & mounting points, & reapply a thin layer of axle grease.
7. Align the rear wheel & tighten the rear axle nut. Push the brake pedal to pump up the brake fluid.
