

# Dual-sport Luggage Rack

Part# AB-12032

Fits: '13+ RR, '14+ RS & RR-S, & XTrainer

## Installation Instructions:

1. Remove the silencer on both 2-stroke & 4-stroke models.
2. Remove both rear side-panel screws, & both rear fender under-mount screws.
3. Place the rack into position, having a rag on the rear fender will prevent scuffing.
4. Install included side mount panhead screws with aluminum spacers, both on the outside of the side panel, leaving them loosely fastened.
5. Install both under fender cap head screws & leave them loosely fastened. Align the rack for proper fitment.
6. Test fit/mount the silencer to see if there's clearance between the right rear mount & the silencer.
7. If there's enough clearance, tighten all 4 screws securely.
8. If there's any contact between the silencer & luggage mount, use the optional 15mm thick spacer on the inner rear silencer mount to provide sufficient clearance.
9. Check that the rack fits & aligns correctly & that all fasteners are snug. An optional small dab of blue Loctite on all 4 spacers will keep them tight.
